

Aniruddh Purohit

Chicago, IL | aniruddhpurohit1992@gmail.com | +1 (312) 684-3854 | www.linkedin.com/in/aniruddhp

PROFESSIONAL SUMMARY

Analytical and detail-oriented professional with 5+ years of experience in business intelligence, data analysis, and reporting. Skilled in translating business requirements into actionable insights using SQL, SSRS, Tableau, and Power BI. Adept at collaborating with cross-functional teams to drive data-informed decisions and support strategic initiatives.

EDUCATION

- **Master's in Information Technology Management**, Illinois Institute of Technology, Chicago May 2020
- **Bachelor's in Computer Science**, Vasavi College of Engineering, Osmania University, Hyderabad June 2014

TECHNICAL SKILLS

- **BI & Analytics Tools:** SSRS, Tableau, Power BI, SSMS, Visual Studio, SQL Profiler, SSIS, RStudio, Semarchy MDM, Informatica PowerCenter, Microsoft Excel
- **Databases:** SQL Server, Oracle, MySQL, PostgreSQL, MongoDB
- **Languages & Scripting:** SQL, PL/SQL, R, Shell Scripting
- **Cloud & DevOps:** AWS (Athena, QuickSight, EC2, RDS, S3), TeamCity, Octopus
- **Version Control & Project Tools:** GitHub, Bitbucket, Jira (Atlassian)

PROFESSIONAL EXPERIENCE

Business Intelligence Developer, PCMI Corporation, Chicago IL Dec 2020 - Mar 2025

- Designed parameterized, drill-down, and matrix reports using SSRS with charts and graphs for 40+ Auto and Consumer clients to support business needs
- Improved report performance by optimizing stored procedures and utilizing SQL Profiler, reducing query time by 70% and enabling retrieval of 1M+ records within seconds
- Improved code quality by completing sprint tickets with a 30% YoY bug reduction through rigorous development testing
- Managed version control through branching, merging, pull requests, and code reviews using Bitbucket and Visual Studio, supported timely deployments across multiple environments
- Handled ad-hoc tasks, including production support for critical reporting issues, SSRS subscriptions, and SQL jobs while performing root cause analysis, resulting in a 25% reduction in downtime
- Designed Power BI dashboards using DAX for fact-level calculations and published reports to Power BI Service
- Gathered business requirements from clients to prepare BRDs and create JIRA user stories, improving backlog clarity and streamlining development planning
- Managed Agile ceremonies including sprint planning, daily stand-ups, sizing, and retrospectives, contributing to improved estimation accuracy and a 40% reduction in sprint spillovers

BI Research Analyst, mLogica Inc., Chicago IL Jan 2020 - May 2020

- Led a multi-phase analytics project using AWS Athena, QuickSight, and Tableau to uncover actionable data insights
- Ingested IMDB datasets into S3 buckets and wrote complex SQL queries in Athena for advanced data analysis
- Designed interactive dashboards on U.S. accident data using QuickSight and Tableau

Senior Analyst, Capgemini Technology Services India Ltd., Mumbai IN July 2014 - July 2017

Project: Capgemini - Platform and Solutions (P&S)

- Analyzed business data using Tableau to uncover trends and support growth, risk assessment, and performance tracking
- Designed and maintained Tableau dashboards to support customer segmentation, product analysis, churn modeling, campaign tracking, and store performance analysis
- Loaded data into Oracle databases via Informatica PowerCenter and integrated it with Tableau for dynamic reporting

Client: BOSE - Perfect Customer Data (PCD)

- Built a centralized customer data repository using Semarchy MDM to enable a 360° view of interactions across sales and service channels, improving overall data accuracy by 70%
- Automated ETL tasks by creating scheduler jobs and streamlined MDM hub loading with optimized customer and interaction mappings, reducing data redundancy by 62%.
- Standardized incoming data by creating data models, enrichers, validations, match rules, and consolidations

ACADEMIC PROJECTS

- **Predictive Analysis Using R:** Built models (KNN, Naïve Bayes, Logistic, Decision Tree, Random Forest) to predict employee attrition, achieved 88% accuracy with Random Forest
- **Database Management:** Designed and implemented a full-stack SQL database for an ad agency, including end-to-end testing and analysis
